
Journal of Computational and Theoretical Nanoscience

Editor-in-Chief: Professor Dr. John Rui-Hua Xie

Computational and theoretical nanoscience. General math… engineering & technology

	All	Since 2012
Citations	20764	15780
h-index	49	42
i10-index	602	442

TITLE	CITED BY	YEAR
Spectral phonon transport properties of silicon based on molecular dynamics simulations and lattice dynamics AS Henry, G Chen Journal of Computational and Theoretical Nanoscience 5 (2), 141-152	397	2008
Negative refractive index materials V Veselago, L Braginsky, V Shklover, C Hafner Journal of Computational and Theoretical Nanoscience 3 (2), 189-218	305	2006
Current status of nanomedicine and medical nanorobotics RA Freitas Journal of Computational and Theoretical Nanoscience 2 (1), 1-25	257	2005
Photonic nanojets A Heifetz, SC Kong, AV Sahakian, A Taflove, V Backman Journal of computational and theoretical nanoscience 6 (9), 1979-1992	203	2009
Molecular-spintronics: the art of driving spin through molecules S Sanvito, AR Rocha Journal of Computational and Theoretical Nanoscience 3 (5), 624-642	189	2006
Effects of heat transfer in flow of nanofluids over a permeable stretching wall in a porous medium M Sheikholeslami, R Ellahi, HR Ashorynejad, G Domairry, T Hayat Journal of Computational and Theoretical Nanoscience 11 (2), 486-496	167	2014
Five-input majority gate, a new device for quantum-dot cellular automata K Navi, S Sayedsalehi, R Farazkish, MR Azghadi Journal of Computational and Theoretical Nanoscience 7 (8), 1546-1553	115	2010
Application of native inhomogeneities to increase compactness of vertical field-effect transistors EL Pankratov, EA Bulaeva Journal of Computational and Theoretical Nanoscience 10 (4), 888-893	102	2013
Influence of morphology on the optical properties of metal nanoparticles AL Gonzalez, C Noguez Journal of computational and theoretical nanoscience 4 (2), 231-238	102	2007
Elastic theory of low-dimensional continua and its applications in bio-and nano-structures ZC Tu, ZC Ou-Yang Journal of Computational and Theoretical Nanoscience 5 (4), 422-448	91	2008
Elastic properties and frequencies of free vibrations of single-layer graphene sheets SS Gupta, RC Batra Journal of Computational and Theoretical Nanoscience 7 (10), 2151-2164	89	2010
Padmakar-Ivan index of TUC4C8 (S) nanotubes AR Ashrafi, A Loghman Journal of Computational and Theoretical Nanoscience 3 (3), 378-381	89	2006
Genetic algorithms for the geometry optimization of atomic and molecular clusters J Zhao, RH Xie Journal of Computational and Theoretical Nanoscience 1 (2), 117-131	86	2004
Graphene nano-ribbons under tension Z Xu Journal of Computational and Theoretical Nanoscience 6 (3), 625-628	80	2009
Influence of S and P doping in a graphene sheet AG Garcia, SE Baltazar, AHR Castro, JFP Robles, A Rubio Journal of Computational and Theoretical Nanoscience 5 (11), 2221-2229	79	2008
Second and third harmonic generation susceptibilities of spherical quantum dots: effects of impurities, electric field and size İ Karabulut, S Baskoutas Journal of Computational and Theoretical Nanoscience 6 (1), 153-156	78	2009

TITLE	CITED BY	YEAR
Free volume properties of sphingomyelin, DMPC, DPPC, and PLPC bilayers M Kupiainen, E Falck, S Ollila, P Niemelä, AA Gurtovenko, MT Hyvönen, ... Journal of Computational and theoretical nanoscience 2 (3), 401-413	75	2005
Density matrix renormalization group for dummies G De Chiara, M Rizzi, D Rossini, S Montangero Journal of Computational and Theoretical Nanoscience 5 (7), 1277-1288	73	2008
Metal-cage bonding, molecular structures and vibrational spectra of endohedral fullerenes: bridging experiment and theory AA Popov Journal of Computational and Theoretical Nanoscience 6 (2), 292-317	72	2009
Finite-difference time-domain modeling of decay rates in the near field of metal nanostructures F Kaminski, V Sandoghdar, M Agio Journal of Computational and Theoretical nanoscience 4 (3), 635-643	67	2007
Decreasing of depth of implanted-junction rectifier in semiconductor heterostructure by optimized laser annealing EL Pankratov Journal of Computational and Theoretical Nanoscience 7 (1), 289-295	66	2010
Multiscale methods for micro/nano flows and materials M Kalweit, D Drikakis Journal of Computational and Theoretical Nanoscience 5 (9), 1923-1938	66	2008
Continuous theory of ferroelectric states in ultrathin films with real electrodes AM Bratkovsky, AP Levanyuk Journal of Computational and Theoretical Nanoscience 6 (3), 465-489	65	2009
Binding energy of donor states in a quantum dot with parabolic confinement S Baskoutas, AF Terzis, E Voutsinas Journal of Computational and Theoretical Nanoscience 1 (3), 315-319	65	2004
Optical solitons in photonic nano waveguides with an improved nonlinear Schrödinger's equation M Savescu, KR Khan, P Naruka, H Jafari, L Moraru, A Biswas Journal of Computational and Theoretical Nanoscience 10 (5), 1182-1191	64	2013
Tunable core size of carbon nanoscrolls X Shi, NM Pugno, H Gao Journal of Computational and Theoretical Nanoscience 7 (3), 517-521	64	2010
Generating highly dark–bright solitons by Gaussian beam propagation in a PANDA ring resonator IS Amiri, J Ali Journal of Computational and Theoretical Nanoscience 11 (4), 1092-1099	62	2014
First-principles study on physical properties of a single ZnO monolayer with graphene-like structure ZC Tu Journal of Computational and Theoretical Nanoscience 7 (6), 1182-1186	62	2010
Fractal dimension on carbon nanotube-polymer composite materials using percolation theory F Mollaamin, M Monajjemi Journal of Computational and Theoretical Nanoscience 9 (4), 597-601	61	2012
Computational studies of viral protein nano-actuators A Dubey, G Sharma, C Mavroidis, MS Tomassone, K Nikitczuk, ... Journal of Computational and Theoretical Nanoscience 1 (1), 18-28	60	2004
Field computations of optical antennas R Kappeler, D Erni, C Xudong, L Novotny Journal of Computational and Theoretical Nanoscience 4 (3), 686-691	58	2007
Effect of thermal radiation for megnetohydrodynamic boundary layer flow of a nanofluid past a stretching sheet with convective boundary conditions S Nadeem, RU Haq Journal of Computational and Theoretical Nanoscience 11 (1), 32-40	57	2014
Optical quantum generation and transmission of 57–61 GHz frequency band using an optical fiber optics IS Amiri, J Ali Journal of Computational and Theoretical Nanoscience 11 (10), 2130-2135	56	2014
Comparison of numerical methods for the analysis of plasmonic structures J Smajic, C Hafner, L Raguin, K Tavzarashvili, M Mishrikey Journal of Computational and Theoretical Nanoscience 6 (3), 763-774	56	2009

TITLE	CITED BY	YEAR
Flexural wave propagation in single-walled carbon nanotubes KM Liew, Y Hu, XQ He Journal of Computational and Theoretical Nanoscience 5 (4), 581-586	56	2008
Computational neurogenetics N Kasabov, L Benuskova Journal of Computational and Theoretical Nanoscience 1 (1), 47-61	56	2004
A new improved firefly algorithm for global numerical optimization GG Wang, L Guo, H Duan, H Wang Journal of Computational and Theoretical Nanoscience 11 (2), 477-485	55	2014
Picosecond soliton pulse generation using a PANDA system for solar cells fabrication IS Amiri, J Ali Journal of Computational and Theoretical Nanoscience 11 (3), 693-701	54	2014
Nanoparticle's size effect on its translocation across a lipid bilayer: A molecular dynamics simulation X Lin, Y Li, N Gu Journal of Computational and Theoretical Nanoscience 7 (1), 269-276	53	2010
Adsorption at nanostructured surfaces from first principles A Groß Journal of Computational and Theoretical Nanoscience 5 (5), 894-922	53	2008
Balaban index of an armchair polyhex, TUC4C8 (R) and TUC4C8 (S) nanotorus A Iranmanesh, AR Ashrafi Journal of Computational and Theoretical Nanoscience 4 (3), 514-517	53	2007
Two-temperature generalized thermoelastic interaction in an infinite fiber-reinforced anisotropic plate containing a circular cavity with two relaxation times IA Abbas, AM Zenkour Journal of Computational and Theoretical Nanoscience 11 (1), 1-7	52	2014
Computational notes on the reactivity of some functional groups M Ibrahim, AA Mahmoud Journal of Computational and Theoretical Nanoscience 6 (7), 1523-1526	52	2009
Transmission enhancement through nanoscale metallic slit arrays from the visible to mid-infrared BJ Lee, YB Chen, ZM Zhang Journal of Computational and Theoretical Nanoscience 5 (2), 201-213	52	2008
Hybridizing harmony search with biogeography based optimization for global numerical optimization G Wang, L Guo, H Duan, H Wang, L Liu, M Shao Journal of Computational and Theoretical Nanoscience 10 (10), 2312-2322	51	2013
Novel efficient adder circuits for quantum-dot cellular automata S Sayedsalehi, MH Moaiyeri, K Navi Journal of Computational and Theoretical Nanoscience 8 (9), 1769-1775	51	2011
Femtosecond optical quantum memory generation using optical bright soliton IS Amiri, J Ali Journal of Computational and Theoretical Nanoscience 11 (6), 1480-1485	50	2014
Hybrid differential artificial bee colony algorithm A Abraham, RK Jatoth, A Rajasekhar Journal of computational and theoretical Nanoscience 9 (2), 249-257	50	2012
New theoretical approach of the physical processes in nanostructures M Agop, N Forna, I Casian-Botez, C Bejenariu Journal of Computational and Theoretical Nanoscience 5 (4), 483-489	50	2008
Review and theory of optical soliton generation used to improve the security and high capacity of MRR and NRR passive systems IS Amiri, P Naraei, J Ali Journal of Computational and Theoretical Nanoscience 11 (9), 1875-1886	49	2014
Silicene and germanene: a first principle study of electronic structure and effect of hydrogenation-passivation S Trivedi, A Srivastava, R Kurchania Journal of Computational and Theoretical Nanoscience 11 (3), 781-788	49	2014
Comparison and evaluation of spectral energy methods for predicting phonon properties JM Larkin, JE Turney, AD Massicotte, CH Amon, AJH McGaughey Journal of Computational and Theoretical Nanoscience 11 (1), 249-256	49	2014

TITLE	CITED BY	YEAR
First-principles study of ferroelectric oxide epitaxial thin films and superlattices: role of the mechanical and electrical boundary conditions J Junquera, P Ghosez Journal of Computational and theoretical nanoscience 5 (11), 2071-2088	49	2008
Event-by-event simulation of quantum phenomena: Application to Einstein-Podolosky-Rosen-Bohm experiments H De Raedt, K De Raedt, K Michielsen, K Keimpema, S Miyashita Journal of Computational and Theoretical Nanoscience 4 (5), 957-991	49	2007
Optical properties of nanostructures from time-dependent density functional theory A Castro, MAL Marques, JA Alonso, A Rubio Journal of Computational and Theoretical Nanoscience 1 (3), 231-255	48	2004
Decreasing of mechanical stress in a semiconductor heterostructure by radiation processing EL Pankratov, EA Bulaeva J. Comp. Theor. Nanoscience 11 (1), 91-101	47	2014
Flow of viscous nanofluid between the concentric cylinders A Zeeshan, M Baig, R Ellahi, T Hayat Journal of Computational and Theoretical Nanoscience 11 (3), 646-654	46	2014
Monte Carlo quantum calculation for double-walled carbon nanotubes (DWNTs) combined to calixarene [6] H Yahyaei, M Monajjemi, H Aghaie, K Zare Journal of Computational and Theoretical Nanoscience 10 (10), 2332-2341	45	2013
Intermolecular Simulation of Nanobiological Structures in Point of Potential Energy and Second Virial Coefficient M Monajjemi, F Mollaamin Journal of Computational and Theoretical Nanoscience 9 (12), 2208-2214	45	2012
High-temperature photonic structures. Thermal barrier coatings, infrared sources and other applications V Shklover, L Braginsky, G Witz, M Mishrikey, C Hafner Journal of Computational and Theoretical Nanoscience 5 (5), 862	45	2008
Event-based corpuscular model for quantum optics experiments K Michielsen, F Jin, H De Raedt Journal of Computational and Theoretical Nanoscience 8 (6), 1052-1080	43	2011
Thin film electrochemical memristive systems for bio-inspired computation V Erokhin, MP Fontana Journal of Computational and Theoretical Nanoscience 8 (3), 313-330	43	2011
Hierarchical coexistence of universality and diversity controls robustness and multi-functionality in protein materials T Ackbarow, MJ Buehler Journal of Computational and Theoretical Nanoscience 5 (7), 1193-1204	43	2008
Chemistry at a higher level of abstraction MN Stojanovic, D Stefanovic Journal of Computational and Theoretical Nanoscience 8 (3), 434-440	42	2011
Conductive and convective types behaviors at nano-time scales I Casian-Botez, M Agop, P Nica, V Paun, GV Munceleanu Journal of Computational and Theoretical Nanoscience 7 (11), 2271-2280	42	2010
New predictions of size-dependent nanoscale based on nonlocal elasticity for wave propagation in carbon nanotubes CW Lim, Y Yang Journal of Computational and Theoretical Nanoscience 7 (6), 988-995	42	2010
Gold, copper, silver and aluminum nanoantennas to enhance spontaneous emission A Mohammadi, V Sandoghdar, M Agio Journal of Computational and Theoretical Nanoscience 6 (9), 2024-2030	42	2009
Szeged index of TUC4C8 (R) nanotube A Iranmanesh, B Soleimani, A Ahmadi Journal of Computational and Theoretical Nanoscience 4 (1), 147-151	42	2007
Conformational sampling of protein flexibility in generalized coordinates: application to ligand docking JA Kovacs, CN Cavasotto, R Abagyan Journal of Computational and Theoretical Nanoscience 2 (3), 354-361	42	2005

TITLE	CITED BY	YEAR
Computation of certain topological indices of nanotubes covered by C 5 and C 7 S Hayat, M Imran Journal of Computational and Theoretical Nanoscience 12 (4), 533-541	40	2015
Counting the number of hetero fullerenes M Ghorbani, AR Ashrafi Journal of Computational and Theoretical Nanoscience 3 (5), 803-810	40	2006
Peyrard–Bishop–Dauxois model of DNA dynamics and impact of viscosity S Zdravkovic, JA Tuszynski, MV Sataric J. Comput. Theor. Nanosci 2, 263-271	40	2005
Fractional order GN model on thermoelastic interaction in an infinite fibre-reinforced anisotropic plate containing a circular hole IA Abbas Journal of Computational and Theoretical Nanoscience 11 (2), 380-384	39	2014
The effective susceptibility concept in the electrodynamics of nano-systems V Lozovski Journal of Computational and Theoretical Nanoscience 7 (10), 2077-2093	39	2010
Nonlocal stress theory for buckling instability of nanotubes: new predictions on stiffness strengthening effects of nanoscales CW Lim, JC Niu, YM Yu Journal of Computational and Theoretical Nanoscience 7 (10), 2104-2111	39	2010
Size-dependent exciton energy of narrow band gap colloidal quantum dots in the finite depth square-well effective mass approximation S Baskoutas, AF Terzis, W Schommers Journal of Computational and Theoretical Nanoscience 3 (2), 269-271	39	2006
Extended Boole-Bell inequalities applicable to quantum theory H De Raedt, K Hess, K Michielsen Journal of Computational and Theoretical Nanoscience 8 (6), 1011-1039	38	2011
Perfect state transfer in quantum walks on graphs VM Kendon, C Tamon Journal of Computational and Theoretical Nanoscience 8 (3), 422-433	38	2011
Nanotube oscillators: Properties and applications JW Kang, HJ Hwang Journal of Computational and Theoretical Nanoscience 6 (11), 2347-2379	38	2009
Cooperative effects in molecular conduction A Landau, L Kronik, A Nitzan Journal of Computational and Theoretical Nanoscience 5 (4), 535-544	38	2008
Comparison of low-storage Runge-Kutta schemes for discontinuous Galerkin time-domain simulations of Maxwell's equations R Diehl, K Busch, J Niegemann Journal of Computational and Theoretical Nanoscience 7 (8), 1572-1580	37	2010
3D reconstruction of carbon nanotube composite microstructure using correlation functions DS Li, M Baniassadi, H Garmestani, S Ahzi, MM Reda Taha, D Ruch Journal of Computational and Theoretical Nanoscience 7 (8), 1462-1468	37	2010
Molecular electronics devices: a short review J Del Nero, FM de Souza, RB Capaz Journal of Computational and Theoretical Nanoscience 7 (3), 503-516	37	2010
Semiconductor device modeling D Vasileska, D Mamaluy, HR Khan, K Raleva, SM Goodnick Journal of Computational and Theoretical Nanoscience 5 (6), 999-1030	37	2008
PI and Szeged indices of one-pentagonal carbon nanocones AR Ashrafi, H Saati Journal of Computational and Theoretical Nanoscience 4 (4), 761-763	37	2007
Simulation of Quantum Computation: A deterministic event-based approach K Michielsen, K De Raedt, H De Raedt Journal of Computational and Theoretical Nanoscience 2 (2), 227-239	37	2005
New exact solutions for boundary-layer flow of a nanofluid past a stretching sheet EH Aly, A Ebaid Journal of Computational and Theoretical Nanoscience 10 (11), 2591-2594	36	2013

TITLE	CITED BY	YEAR
Optimal control for open quantum systems: Qubits and quantum gates R Roloff, M Wenin, W Pötz Journal of Computational and Theoretical Nanoscience 6 (8), 1837-1863	36	2009
Modeling of plasmonic waveguide components and networks G Veronis, ŞE Kocabaş, DAB Miller, S Fan Journal of Computational and Theoretical Nanoscience 6 (8), 1808-1826	36	2009
Entropy generation analysis of nanofluid flow in turbulent and laminar regimes M Moghaddami, S Shahidi, M Siavashi Journal of Computational and Theoretical Nanoscience 9 (10), 1586-1595	35	2012
Effects of rarefaction on cavity flow in the slip regime S Mizzi, DR Emerson, SK Stefanov, RW Barber, JM Reese Journal of computational and theoretical nanoscience 4 (4), 817-822	35	2007
Plane deformation due to thermal source in fractional order thermoelastic media R Kumar, V Gupta, IA Abbas Journal of computational and theoretical nanoscience 10 (10), 2520-2525	34	2013
Numerical calculations of the quantum states in semiconductor nanostructures MH Degani, MZ Maialle Journal of Computational and Theoretical Nanoscience 7 (2), 454-473	34	2010
Theoretical analysis of diamond mechanosynthesis. Part I. Stability of C2 mediated growth of nanocrystalline diamond C (110) surface J Peng, RA Freitas, RC Merkle Journal of computational and theoretical nanoscience 1 (1), 62-70	34	2004
Double image multi-encryption algorithm based on fractional chaotic time series L Zhang, B He, J Sun, M Lai, Z Lv Journal of Computational and Theoretical Nanoscience 12 (11), 4980-4986	33	2015
Nanometer bandwidth soliton generation and experimental transmission within nonlinear fiber optics using an add-drop filter system IS Amiri, SE Alavi, M Bahadoran, A Afroozeh, H Ahmad Journal of Computational and Theoretical Nanoscience 12 (2), 221-225	33	2015
Three-phase lag model on thermoelastic interaction in an unbounded fiber-reinforced anisotropic medium with a cylindrical cavity IA Abbas Journal of Computational and Theoretical Nanoscience 11 (4), 987-992	33	2014
Influence of heat and mass transfer on micropolar fluid of blood flow through a tapered stenosed arteries with permeable walls R Ellahi, SU Rahman, S Nadeem, NS Akbar Journal of Computational and Theoretical Nanoscience 11 (4), 1156-1163	33	2014
Graphene-carbon nanotube composites EF Sheka, LA Chernozatonskii Journal of Computational and Theoretical Nanoscience 7 (9), 1814-1824	33	2010
How to compute the atomic stress objectively? B Liu, X Qiu Journal of Computational and Theoretical Nanoscience 6 (5), 1081-1089	33	2009
Computational nanomechanics of materials WK Liu, S Jun, D Qian Journal of Computational and Theoretical Nanoscience 5 (5), 970-996	33	2008
Event-by-event simulation of quantum cryptography protocols S Zhao, H De Raedt Journal of Computational and Theoretical Nanoscience 5 (4), 490-504	33	2008
Design and analysis of a molecular tool for carbon transfer in mechanosynthesis DG Allis, EK Drexler Journal of Computational and Theoretical Nanoscience 2 (1), 45-55	33	2005
Grey Clustering Analysis-Based Tennis Racket of Nanometer Materials Kinematic Mechanics Applied Research B Zhang, X Cao, W Jiang, L Liu, F Li Journal of Computational and Theoretical Nanoscience 12 (10), 3218-3222	32	2015

TITLE	CITED BY	YEAR
Analytical treatment of the ring resonator passive systems and bandwidth characterization using directional coupling coefficients IS Amiri, SE Alavi, H Ahmad Journal of Computational and Theoretical Nanoscience 12 (3), 418-424	32	2015
Identifying multi-functional enzyme by hierarchical multi-label classifier Q Zou, W Chen, Y Huang, X Liu, Y Jiang Journal of Computational and Theoretical Nanoscience 10 (4), 1038-1043	32	2013
Using splitting artificial plant optimization algorithm to solve toy model of protein folding Z Cui, D Liu, J Zeng, Z Shi Journal of Computational and Theoretical Nanoscience 9 (12), 2255-2259	32	2012
Efficiency analysis of swarm intelligence and randomization techniques XS Yang Journal of Computational and Theoretical Nanoscience 9 (2), 189-198	32	2012
Simulation of electron transport in nanoscale independent-gate double-gate devices using a full 2D Green's function approach JL Autran, D Munteanu Journal of Computational and Theoretical Nanoscience 5 (6), 1120-1127	32	2008
Padmakar-Ivan (PI) index of HAC5C7 [r, p] nanotubes A Iranmanesh, O Khormali Journal of Computational and Theoretical Nanoscience 5 (1), 131-139	32	2008
Error correction and digitalization concepts in biochemical computing L Fedichkin, E Katz, V Privman Journal of Computational and Theoretical Nanoscience 5 (1), 36-43	32	2008
Large-scale hierarchical molecular modeling of nanostructured biological materials MJ Buehler Journal of Computational and Theoretical Nanoscience 3 (5), 603-623	32	2006
Finite-amplitude motions of beam resonators and their stability EM Abdel-Rahman, MI Younis, AH Nayfeh Journal of Computational and Theoretical Nanoscience 1 (4), 385-391	32	2004
Theoretical analysis of diamond mechanosynthesis. Part II. C2 mediated growth of diamond C (110) surface via Si/Ge-triadamantane dimer placement tools DJ Mann, J Peng, RA Freitas, RC Merkle Journal of Computational and Theoretical Nanoscience 1 (1), 71-80	32	2004
An analytical transport model for nanomaterials: The quantum version P Di Sia Journal of Computational and Theoretical Nanoscience 9 (1), 31-34	31	2012
Atomistic simulation of nanowire transistors M Luisier, A Schenk Journal of Computational and Theoretical Nanoscience 5 (6), 1031-1045	31	2008
Modeling of self-healing polymer composites reinforced with nanoporous glass fibers V Privman, A Dementsov, I Sokolov Journal of Computational and Theoretical Nanoscience 4 (1), 190-193	31	2007
Evolutionary fuzzy clustering algorithm with knowledge-based evaluation and applications for gene expression profiling HS Park, SH Yoo, SB Cho Journal of Computational and Theoretical Nanoscience 2 (4), 524-533	31	2005
From discrete time quantum walk to continuous time quantum walk in limit distribution Y Shikano Journal of Computational and Theoretical Nanoscience 10 (7), 1558-1570	30	2013
Small universal spiking neural P systems with anti-spikes T Song, Y Jiang, X Shi, X Zeng Journal of Computational and Theoretical Nanoscience 10 (4), 999-1006	30	2013
The Laplace homotopy analysis method for solving a general fractional diffusion equation arising in nano-hydrodynamics AS Arife, SK Vanani, F Soleymani Journal of Computational and Theoretical Nanoscience 10 (1), 33-36	30	2013

TITLE	CITED BY	YEAR
Structures and stabilities of platinum–gold nanoclusters A Logsdail, LO Paz-Borbón, RL Johnston Journal of Computational and Theoretical Nanoscience 6 (4), 857-866	30	2009
Recent Progress in the Computational Study of Silicon and Germanium Clusters with Transition Metal Impurities JG Han, F Hagelberg Journal Of Computational And Theoretical Nanoscience 6 (2), 257-269	30	2009
Effects of shape on the phase stability of nanoparticles G Guisbiers, G Abudukelimu, F Clement, M Wautelet Journal of Computational and Theoretical Nanoscience 4 (2), 309-315	30	2007
Buckling, bundling, and pattern formation: From semi-flexible polymers to assemblies of interacting filaments J Kierfeld, P Gutjahr, T Kühne, P Kraikivski, R Lipowsky Journal of Computational and Theoretical Nanoscience 3 (6), 898-911	30	2006
Localization of quantum walks induced by recurrence properties of random walks E Segawa Journal of Computational and Theoretical Nanoscience 10 (7), 1583-1590	29	2013
Influence of the rotation and gravity field on Stonely waves in a non-homogeneous orthotropic elastic medium AM Abd-Alla, SM Abo-Dahab, TA Al-Thamali, SR Mahmoud Journal of Computational and Theoretical Nanoscience 10 (2), 297-305	29	2013
Modeling of ant colony's labor division for the multi-project scheduling problem and its solution by PSO R Xiao, W Chen, T Chen Journal of Computational and Theoretical Nanoscience 9 (2), 223-232	29	2012
Superlatt. Microstruct. 46, 760 (2009); S. Pahari, S. Bhattacharya, and KP Ghatak S Pahari J. Comput. Theor. Nanosci 6, 2088	29	2009
A minimal toolset for positional diamond mechanosynthesis RA Freitas, RC Merkle Journal of computational and theoretical nanoscience 5 (5), 760-861	29	2008
Uniquimer: software of de novo DNA sequence generation for DNA self-assembly—an introduction and the related applications in DNA self-assembly B Wei, Z Wang, Y Mi Journal of Computational and Theoretical Nanoscience 4 (1), 133-141	29	2007
Silicon-carbide nano-clusters: A pathway to future nano-electronics AK Ray, MN Huda Journal of Computational and Theoretical Nanoscience 3 (3), 315-341	29	2006
Theoretical analysis of diamond mechanosynthesis. Part III. Positional C2 deposition on diamond C (110) surface using Si/Ge/Sn-based dimer placement tools J Peng, RA Freitas, RC Merkle, JR Von Ehr, JN Randall, GD Skidmore Journal of Computational and Theoretical Nanoscience 3 (1), 28-41	29	2006
Studies of carbon nanotube-based oscillators using molecular dynamics S Xiao, DR Andersen, RP Han, W Hou Journal of Computational and Theoretical Nanoscience 3 (1), 142-147	29	2006
Quantum-inspired evolutionary algorithms and binary particle swarm optimization for training MLP and SRN neural networks GK Venayagamoorthy, G Singhal Journal of Computational and Theoretical Nanoscience 2 (4), 561-568	29	2005
Comparison of Control Light Using Kramers–Kronig Method by Three Waveguides A Afroozeh, IS Amiri, SE Pourmand, A Zeinalinezhad, SE Alavi, H Ahmad Journal of Computational and Theoretical Nanoscience 12 (8), 1864-1868	28	2015
Endoscopic effects on the Peristaltic flow of Cu-water nanofluid NS Akbar Journal of Computational and Theoretical Nanoscience 11 (4), 1150-1155	28	2014

TITLE	CITED BY	YEAR
Nanoparticle analysis for non-orthogonal stagnation point flow of a third order fluid towards a stretching surface S Nadeem, R Mehmood, NS Akbar Journal of Computational and Theoretical Nanoscience 10 (11), 2737-2747	28	2013
Radial vibrations in a non-homogeneous orthotropic elastic hollow sphere subjected to rotation AM Abd-Alla, GA Yahya, SR Mahmoud Journal of Computational and Theoretical Nanoscience 10 (2), 455-463	28	2013
An analytical transport model for nanomaterials P Di Sia Journal of Computational and Theoretical Nanoscience 8 (1), 84-89	28	2011
A review on DNA computing models J Xu, G Tan Journal of Computational and Theoretical Nanoscience 4 (7-8), 1219-1230	28	2007
Nanomechanical shuttle transfer of electrons RI Shekhter, LY Gorelik, M Jonson, YM Galperin, VM Vinokur Journal of Computational and Theoretical Nanoscience 4 (5), 860-895	28	2007
A hybrid density functional study of armchair Si and Ge nanotubes P Pradhan, AK Ray Journal of Computational and Theoretical Nanoscience 3 (1), 128-133	28	2006

An analytical approach to study breakdown mechanism in graphene nanoribbon field effect transistors M Ghadiry, M Nadi, M Saiedmanesh, H Abadi Journal of Computational and Theoretical Nanoscience 11 (2), 339-343	10	2014

TITLE	CITED BY	YEAR
Molecular Modelling Analyses of the Substituted 3′-Azido-2′, 3′ Dideoxythymidine Z Al-Fifi, M Eid, NA Saleh, M Ibrahim Journal of Computational and Theoretical Nanoscience 11 (2), 409-412	10	2014
A novel approach to identify protein coding domains by sampling binary profiles from genome T Song, X Wang, Y Su Journal of Computational and Theoretical Nanoscience 11 (1), 147-152	10	2014
A New Approach to the Characterization of the Nano-Film Structure on Modified Electrode Systems by Factor Analysis Model E Dinç, AO Solak Journal of Computational and Theoretical Nanoscience 11 (1), 25-31	10	2014
Study of abrasive flow machining parameter optimization based on Taguchi method J Li, W Liu, L Yang, F Sun Journal of Computational and Theoretical Nanoscience 10 (12), 2949-2954	10	2013
Fullerene as Sensor for Halides: Modeling Approach H Elhaes, M Ibrahim Journal of Computational and Theoretical Nanoscience 10 (9), 2026-2028	10	2013
Application of molecular dynamics in mechanical characterization of carbon nanocones MMS Fakhrabadi, B Dadashzadeh, V Norouzifard, A Allahverdizadeh Journal of Computational and Theoretical Nanoscience 10 (9), 1921-1927	10	2013
Computing the eccentricity-related invariants of single-defect carbon nanocones Y Alizadeh, M Azari, T Došlić Journal of Computational and Theoretical Nanoscience 10 (6), 1297-1300	10	2013
MRPGA: motif detecting by modified random projection strategy and genetic algorithm X Wang, T Song, Z Wang, Y Su, X Liu Journal of Computational and Theoretical Nanoscience 10 (5), 1209-1214	10	2013
Effect of particle size on activation energy for thermal decomposition of nano-CaCO3 Z Cui, Y Xue, L Xiao, T Wang Journal of Computational and Theoretical Nanoscience 10 (3), 569-572	10	2013
Sadhana Index in Nanotechnology PV Khadikar, AR Ashrafi, MV Diudea, S Aziz, S Pandit, H Achrya, B Shaik, ... Journal of Computational and Theoretical Nanoscience 10 (1), 181-188	10	2013
Influence of carbon-doping by boron/nitrogen substitution in boron nitride nanotube, a density functional theory study of nuclear quadrupole resonance parameters J Kaur, N Goel Journal of Computational and Theoretical Nanoscience 10 (1), 48-53	10	2013
Vibration analysis of a carbon nanotube-based resonator using finite element method SS Chu, SJ Wu, WJ Chang Journal of Computational and Theoretical Nanoscience 10 (1), 119-122	10	2013
Molecular Dynamics Simulations of Zinc Oxide Nanostructures Under Strain: I-Nanoribbons ME Kilic, S Erkoc Journal of Computational and Theoretical Nanoscience 10 (1), 104-111	10	2013
Estimation of theoretical sound velocity in the ternary liquid systems (glucose+ α-amylase solution) S Nithiyanantham, L Palaniappan, R Jeyalakshmi Journal of Computational and Theoretical Nanoscience 9 (8), 1115-1119	10	2012
Spectroscopic analyses of chitosan interactions with amino acids MA Ibrahim, AEDA Gawad Journal of Computational and Theoretical Nanoscience 9 (8), 1120-1124	10	2012
Visualization of nano-sized objects by scattering of surface plasmon polariton theoretical aspects of the problem V Lozovski Journal of Computational and Theoretical Nanoscience 9 (6), 859-863	10	2012
Partition Function of the Protein Conformational State Q Zhao Journal of Computational and Theoretical Nanoscience 9 (5), 745-751	10	2012
Cell number optimization for quantum cellular automata based on AND-OR-Inverter Z Beiki, S Mirzakuchaki, M Soryani, N Mozayani Journal of Computational and Theoretical Nanoscience 9 (5), 627-630	10	2012

TITLE	CITED BY	YEAR
Adsorption of Aromatic Heterocyclic Compounds on Pristine and Defect Graphene: A First-Principles Study L Yu, H Gao, J Zhao, J Qiu, C Yu Journal of Computational and Theoretical Nanoscience 8 (12), 2492-2497	10	2011
Nonlocal plate model for the free vibration analysis of nanoplates with different boundary conditions A Shakouri, TY Ng, RM Lin Journal of computational and theoretical nanoscience 8 (10), 2118-2128	10	2011
Hybrid CMOS-SET arithmetic circuit design using Coulomb blockade oscillation characteristic G Deng, C Chen Journal of Computational and Theoretical Nanoscience 8 (8), 1520-1526	10	2011
Using layered geometry Green's functions in the multiple multipole program A Alparslan, C Hafner Journal of Computational and Theoretical Nanoscience 8 (8), 1600-1608	10	2011
Cold atom qubits D Solenov, D Mozyrsky Journal of Computational and Theoretical Nanoscience 8 (3), 481-489	10	2011
Simulation study of the silicon oxide and water interface CD Lorenz, M Tsige, SB Rempe, M Chandross, MJ Stevens, GS Grest Journal of Computational and Theoretical Nanoscience 7 (12), 2586-2601	10	2010
Current distance response for rapid DNA sequencing W Su, R Dong, X Yan, H Wang, H Liu Journal of Computational and Theoretical Nanoscience 7 (10), 1885-1888	10	2010
The effects of grafted carboxyl groups on the elastic properties of single-walled boron nitride nanotubes J Yuan, KM Liew Journal of Computational and Theoretical Nanoscience 7 (10), 1878-1884	10	2010
The eccentric connectivity index of zig-zag polyhex nanotubes and nanotori M Saheli, AR Ashrafi Journal of Computational and Theoretical Nanoscience 7 (10), 1900-1903	10	2010
An atomistic study of the strength of protein–mineral interface of biological materials with a biomimicking model system at nanoscale B Ji Journal of Computational and Theoretical Nanoscience 7 (7), 1265-1271	10	2010
Molecular dynamics simulations of stretching, twisting and fracture of super carbon nanotubes with different chiralities: towards smart porous and flexible scaffolds VR Coluci, NM Pugno Journal of Computational and Theoretical Nanoscience 7 (7), 1294-1298	10	2010
The Onsager equation for corpora P Constantin Journal of Computational and Theoretical Nanoscience 7 (4), 675-682	10	2010
Partial slip contact problem in a graded half plane I Kallel-Kamoun, R Elloumi, S El-Borgi Journal of Computational and Theoretical Nanoscience 7 (2), 367-378	10	2010
Modeling of nanoindentation data and characterization of polymer nanocomposites by a multiscale stochastic finite element method A Kontsos, PD Spanos Journal of Computational and Theoretical Nanoscience 6 (10), 2273-2282	10	2009
Molecular dynamics of adsorption of argon on graphene, carbon nanotubes and carbon nanotubes bundles JS Pushparajalingam, M Kalweit, M Labois, D Drikakis Journal of Computational and Theoretical Nanoscience 6 (10), 2156-2163	10	2009
Surface interaction and behavior of poly (amidoamine) dendrimers: deformability and lipid bilayer disruption IJ Majoros, CR Williams, AC Becker, JR Baker Journal of computational and theoretical nanoscience 6 (7), 1430-1436	10	2009
Surface states on semiconductor nanocrystals: The effects of unpassivated dangling bonds GW Bryant Journal of Computational and Theoretical Nanoscience 6 (6), 1262-1271	10	2009

TITLE	CITED BY	YEAR
Elasticity of single-crystal calcite by first-principles calculations J Zhao, B Zhou, B Liu, W Guo Journal of Computational and Theoretical Nanoscience 6 (5), 1181-1188	10	2009
Analysis of extreme light transmission through a nanohole in a metal film based on discrete sources method E Eremina, Y Eremin, N Grishina, T Wriedt Journal of Computational and Theoretical Nanoscience 6 (3), 795-803	10	2009
Electromagnetic Fields Scattered by Sub-Wavelength Sized Object of Drude Type Material in the Optical Region, Using a Finite Element Time Domain Method B Oswald, P Leidenberger Journal of Computational and Theoretical Nanoscience 6 (3), 784-794	10	2009
Multi-walled carbon nanotube oscillators as multi-frequency generators for nano embedded systems JW Kang, OK Kwon, JH Lee Journal of Computational and Theoretical Nanoscience 5 (3), 290-293	10	2008
SIWO: A hybrid algorithm combined with the conventional SCE and novel IWO X Zhang, Y Wang, G Cui, Y Wang Journal of Computational and Theoretical Nanoscience 4 (7-8), 1316-1323	10	2007
